

**Profit Glitch is a fully-automatic income generating system** that requires absolutely no experience or technical knowledge. With Profit Glitch, *every member makes money and no one is left behind.* Guaranteed!

In a nutshell, here's how it works: In 2009, an anonymous inventor under the name of Satoshi Nakamoto created a Digital Currency called Bitcoin. Bitcoin is not owned by anyone and is a decentralized currency which is created and maintained by a network of computers around the world.

With Bitcoin, 'miners' use special computer software to solve math problems and are issued a certain number of Bitcoins in exchange for their help. *When Bitcoin first began in 2009* it was very easy to download a free software and 'Mine' your own bitcoins.

Bitcoin went crazy and has taken the world by storm. Modern corporations, banks and websites have started using and accepting Bitcoin as a form of payment for goods and services. **1 Bitcoin is now worth \$901.32 US Dollars!**

When I first started mining Bitcoin, it was very easy! All I had to use was my cheap dell computer to mine my own bitcoins and I made a lot of money in a very short period of time. But, because of the way that Bitcoin is setup, the mathematical equations that bitcoin miners solve get more and more difficult over time. While in the old days you could mine bitcoin with just your PC and make money, *it's not that easy nowadays.*

In 2011 I took some of my profits and started investing in more powerful mining computers and systems so that I could continue to mine bitcoins and make money. I started inviting friends and family to join in on the fun and reap the benefits of the money that I was making.

By staying ahead of technology and upgrading my computer mining systems every few months, I have been able to consistently make huge profits with Bitcoin. I made so much profit in 2011 that I started leasing out warehouse space in Houston to house my mining computers.

**Here's a photo of my server room in Houston, TX:**

These systems are running 24/7 generating and mining Bitcoin and have made me very, very rich over the past 7 years.

**Now here's where it gets very exciting for you...**

I'm sure you've seen the news lately. The world is a lot different than it was 5 or 10 years ago. I know people that went to college and received their Masters Degree and still cannot feed a family of 4. It's awful and completely unacceptable. Something needs to change and it needs to change fast.

I'm not going to sit around and wait for the economy to change or get better. The time to make money is right now. That's why I started mining Bitcoin in the first place, because I didn't see anything changing in the world and the economy and I knew there had to be a better way! Well THERE is.

Now, for the first time ever, the Profit Glitch System is available for you to make money with starting today, not tomorrow! Profit Glitch is different than any other system that you may have used to try and make money online. **Completely Different.**
